Work Experience

Web Development
Traceable
August 2021 to october 2021 (3 months)
Did a freelance project for Traceable.io.
Built a static webpage using React and vanilla css. I was able to deliver the product in time and completed the tasks assigned for me.

Automation and manual testing
Cognizant
August 2020 to June 2021 (10 months)
I got trained in automation testing in java(selinium), and was deployed into cognizant's client project. Did both manual and automation testing for the client software. Build the possible testcases for the client software in the given time.
